

Help – with Family Resources – is at Your Fingertips.

Download the new **Chesterfield County Community Care mobile app** for Apple or Android devices!

Getting the information you need is sometimes difficult, and it only gets more difficult when you are in need of help quickly. The new Community Care mobile app provides county families with children the information they need. Whether it's help with parenting, disabilities, transportation, substance abuse or finding a great park, the Community Care app will help connect you with the right people who can provide assistance. Users can browse by category or search department descriptions to learn how to get help, where that help is located and contact information.

Providing a FIRST CHOICE community through excellence in public service
